PUPPY & JUNIOR With Chicken and Rice

pack size: 1,5, 4 and 15 kg

Complete dog food

Promotes the correct development and growth of your puppy

Indicated especially for puppies and young dogs up to 12 months of age and for pregnant and nursing females. The high content of proteins from chicken and carbohydrates from rice make the product highly digestible, satisfying the high energy requirements needed for healthy development in the very important, early months of growth. The correct calcium/phosphorus ratio, necessary for healthy muscles and teeth, together with all of the raw materials used, from high quality fish to prebiotics like FOS and Yucca Schidigera (which reduces faecal odour), make this product an excellent support for the correct development and growth of your puppy. It also contains choline chloride, which aids in the digestion of fats and helps protect the liver. It guarantees the optimal ratio between the fatty acids Omega-3 and Omega-6 for ever younger skin.

COMPOSITION

cereals (rice min. 5%), meats and by-products (chicken min. 5%), by-products of vegetable origin (beet pulp), oils and fats, vegetable protein extracts, fish and fish by-products, F.O.S. (fructooligosaccharides) 500 mg/kg, Yucca Schidigera 0,1%, minerals.
