

# HOW TO INTRODUCE A NEW FOOD

- Introduce the new food gradually over the course of at least 7 days to prevent digestive problems.
- Mix the new kibble with the one currently being used, gradually increasing the amount of new food and reducing the old food, until it is completely replaced, as shown below:

Current food **75%**  
New food **25%**

1<sup>st</sup>-2<sup>nd</sup> DAY

Current food **25%**  
New food **75%**

5<sup>th</sup>-6<sup>th</sup> DAY

Current food **50%**  
New food **50%**

3<sup>rd</sup>-4<sup>th</sup> DAY

Current food **0%**  
New food **100%**

7<sup>th</sup> DAY

The percentages refer to the daily portions recommended on the label.

These are general indications.

This advice is also valid if the new product is of the same brand,  
or if the size, age or lifestyle of the animal change.

**Consult your vet, who will be able to advise you about the appropriate portion for your animal.**
